

PCA plot showing the relationship between log(First Component) (X-axis) and log(Second Component) (Y-axis). The plot displays a dense cluster of points, primarily colored red, indicating a large group of genes. A few points are colored teal, representing a distinct subset. The X-axis ranges from 0.0 to 0.5, and the Y-axis ranges from 0.0 to 0.6. A legend on the right indicates the 'withinSubset' status: red circles for 'rest' and teal triangles for 'true'.
