

A scatter plot showing the relationship between the log(First Component) on the x-axis and the log(Third Component) on the y-axis. The x-axis ranges from 0.0 to 2.0, and the y-axis ranges from 0.0 to 2.0. Data points are categorized into two groups: 'rest' (red circles) and 'true' (teal triangles). The 'true' points are more widely distributed, with some outliers at higher log(Third Component) values (e.g., 234741, 253352). The 'rest' points are more clustered, particularly in the region where both components are high (log(First Component) > 1.5, log(Third Component) > 1.0). A legend on the right side of the plot indicates the 'withinSubset' for each point.
