

A scatter plot showing the relationship between the log(Second Component) on the x-axis and the log(Third Component) on the y-axis. The data points are categorized by 'withinSubset' into two groups: 'rest' (represented by red circles) and 'true' (represented by teal triangles). The 'true' group consists of two points: one at approximately (0.0, 0.0) labeled '0600' and another at approximately (3.9, 3.7) labeled '226950'. The 'rest' group consists of a dense cluster of points between x-values of 3.1 and 3.8 and y-values of 3.6 and 4.0. Several points in the 'rest' cluster are labeled with IDs: 252382, 234883, 226891, 226893, 226894, 226895, 226896, 226897, 226898, 226899, 226900, 226901, 226902, 226903, 226904, 226905, 226906, 226907, 226908, 226909, 226910, 226911, 226912, 226913, 226914, 226915, 226916, 226917, 226918, 226919, 226920, 226921, 226922, 226923, 226924, 226925, 226926, 226927, 226928, 226929, 226930, 226931, 226932, 226933, 226934, 226935, 226936, 226937, 226938, 226939, 226940, 226941, 226942, 226943, 226944, 226945, 226946, 226947, 226948, 226949, 226950, 226951, 226952, 226953, 226954, 226955, 226956, 226957, 226958, 226959, 226960, 226961, 226962, 226963, 226964, 226965, 226966, 226967, 226968, 226969, 226970, 226971, 226972, 226973, 226974, 226975, 226976, 226977, 226978, 226979, 226980, 226981, 226982, 226983, 226984, 226985, 226986, 226987, 226988, 226989, 226990, 226991, 226992, 226993, 226994, 226995, 226996, 226997, 226998, 226999. The plot includes a light gray grid.
