

Lnc RNAs: All

```
lncRNA group = IDRlessthan0_1 ::: data cols = lncRNA
```

Scatter plot showing the relationship between $\log(\text{Second Component})$ (X-axis) and $\log(\text{First Component})$ (Y-axis) for 1000 stars. The plot is divided into two groups based on parallax:

- Red circles: Stars with $\text{parallax} < 10$ mas.
- Teal triangles: Stars with $\text{parallax} > 10$ mas.

The X-axis ranges from 0.0 to 1.5, and the Y-axis ranges from 0.0 to 1.5. The plot shows a dense cluster of stars, with a significant number of outliers at the extremes of the axes.
