

PCA of lncRNA expression data  
all lnc RNAs lncRNA group = allLncRNA :: data cols = bothPullDowns  
( 49 / 3716 ) = (func/total lncRNA) :: biotype = lincProcTrans

PCA plot showing the distribution of samples based on the log-transformed first component. The x-axis is labeled 'log(First Component)' and ranges from 0 to 4. The y-axis is unlabeled. Data points are colored red and teal triangles. Labeled points include 0600, 226950, 251562, and a cluster of points at the top right.

Sample ID	log(First Component)	log(Second Component)	Color	Shape
0600	0.0	4.0	Teal	Triangle
226950	3.5	2.5	Teal	Triangle
251562	3.5	0.5	Teal	Triangle
